

The background features a blurred image of a person in a white lab coat, likely a healthcare professional, with their hands clasped. Overlaid on this is a network of white icons connected by lines, including a heart with an ECG line, a syringe, a clipboard, a microscope, a water drop, a thermometer, a kidney, and laboratory flasks. A white ECG line runs horizontally across the middle of the image, passing behind the text.

Telemedicine Health Checkup Solution

Device

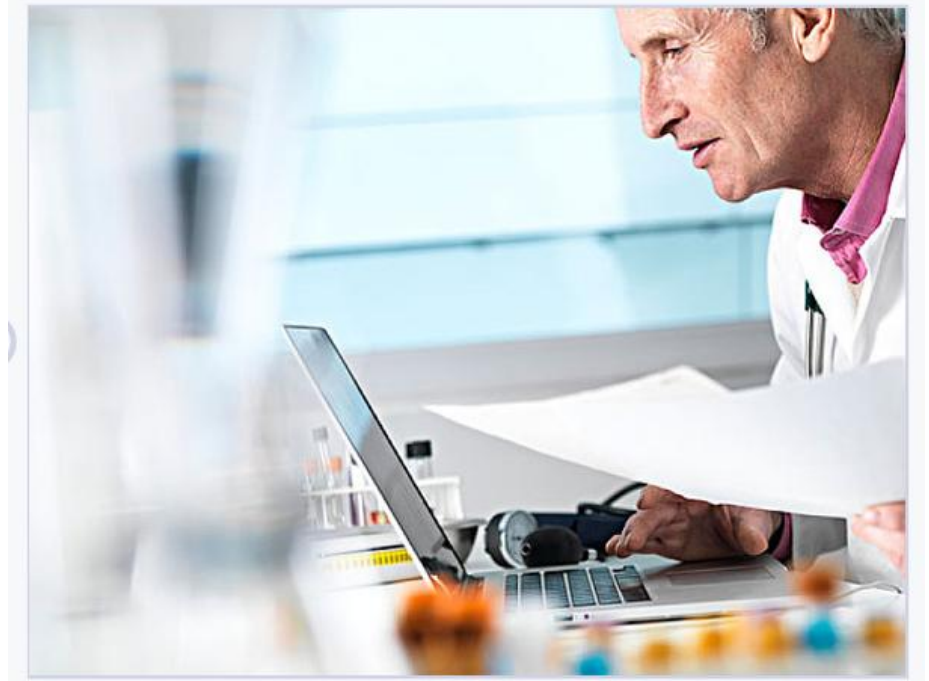

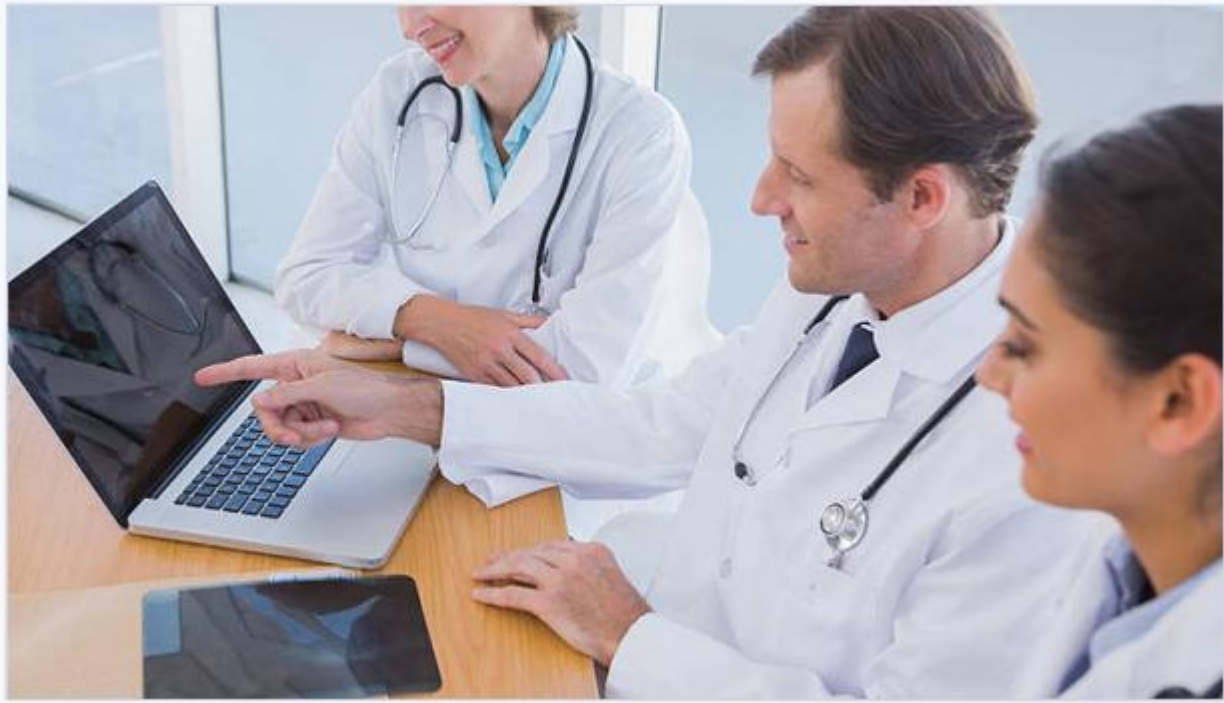

- The integrated design, it realizes the integration of intelligent calling and health checkup with doctor and patient.
- Internet smart hospital equipment, which can make remote calls and query reports online.
- The multi-function inspection can avoid the tedious process of going to the hospital, such as registering, consulting with a doctor, checking blood pressure and other parameters, and the entire process from registering to receiving the doctor's prescription can be directly on the machine, saving time.
- Safe design, strong privacy, and personal information can be protected during the treatment process.

Product interior design

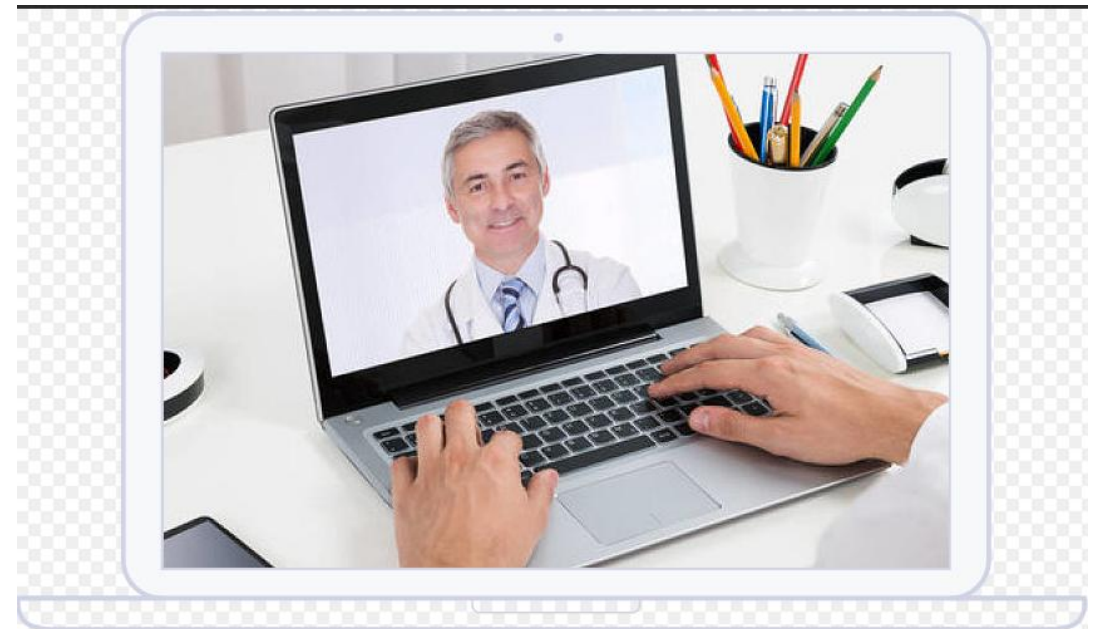

- ◆ A safe and comfortable environment for use
- ◆ Ergonomic (reasonable setting of measuring area)
- ◆ Large screen display for easy application
- ◆ Remote call service support
- ◆ HD camera for clearer telemedicine
- ◆ Optional surveillance camera (supports remote monitoring), which can monitor whether someone is vandalizing the equipment.
- ◆ Optional body composition measurement, can analyze the human body indicators
- ◆ Easy move blood pressure meter drawer
- ◆ Optional ECG function

TeleMedicine video calling system

**Support intergrate the third video calling system or
intergrate their owner platfrom .
Or use our video calling system directly**

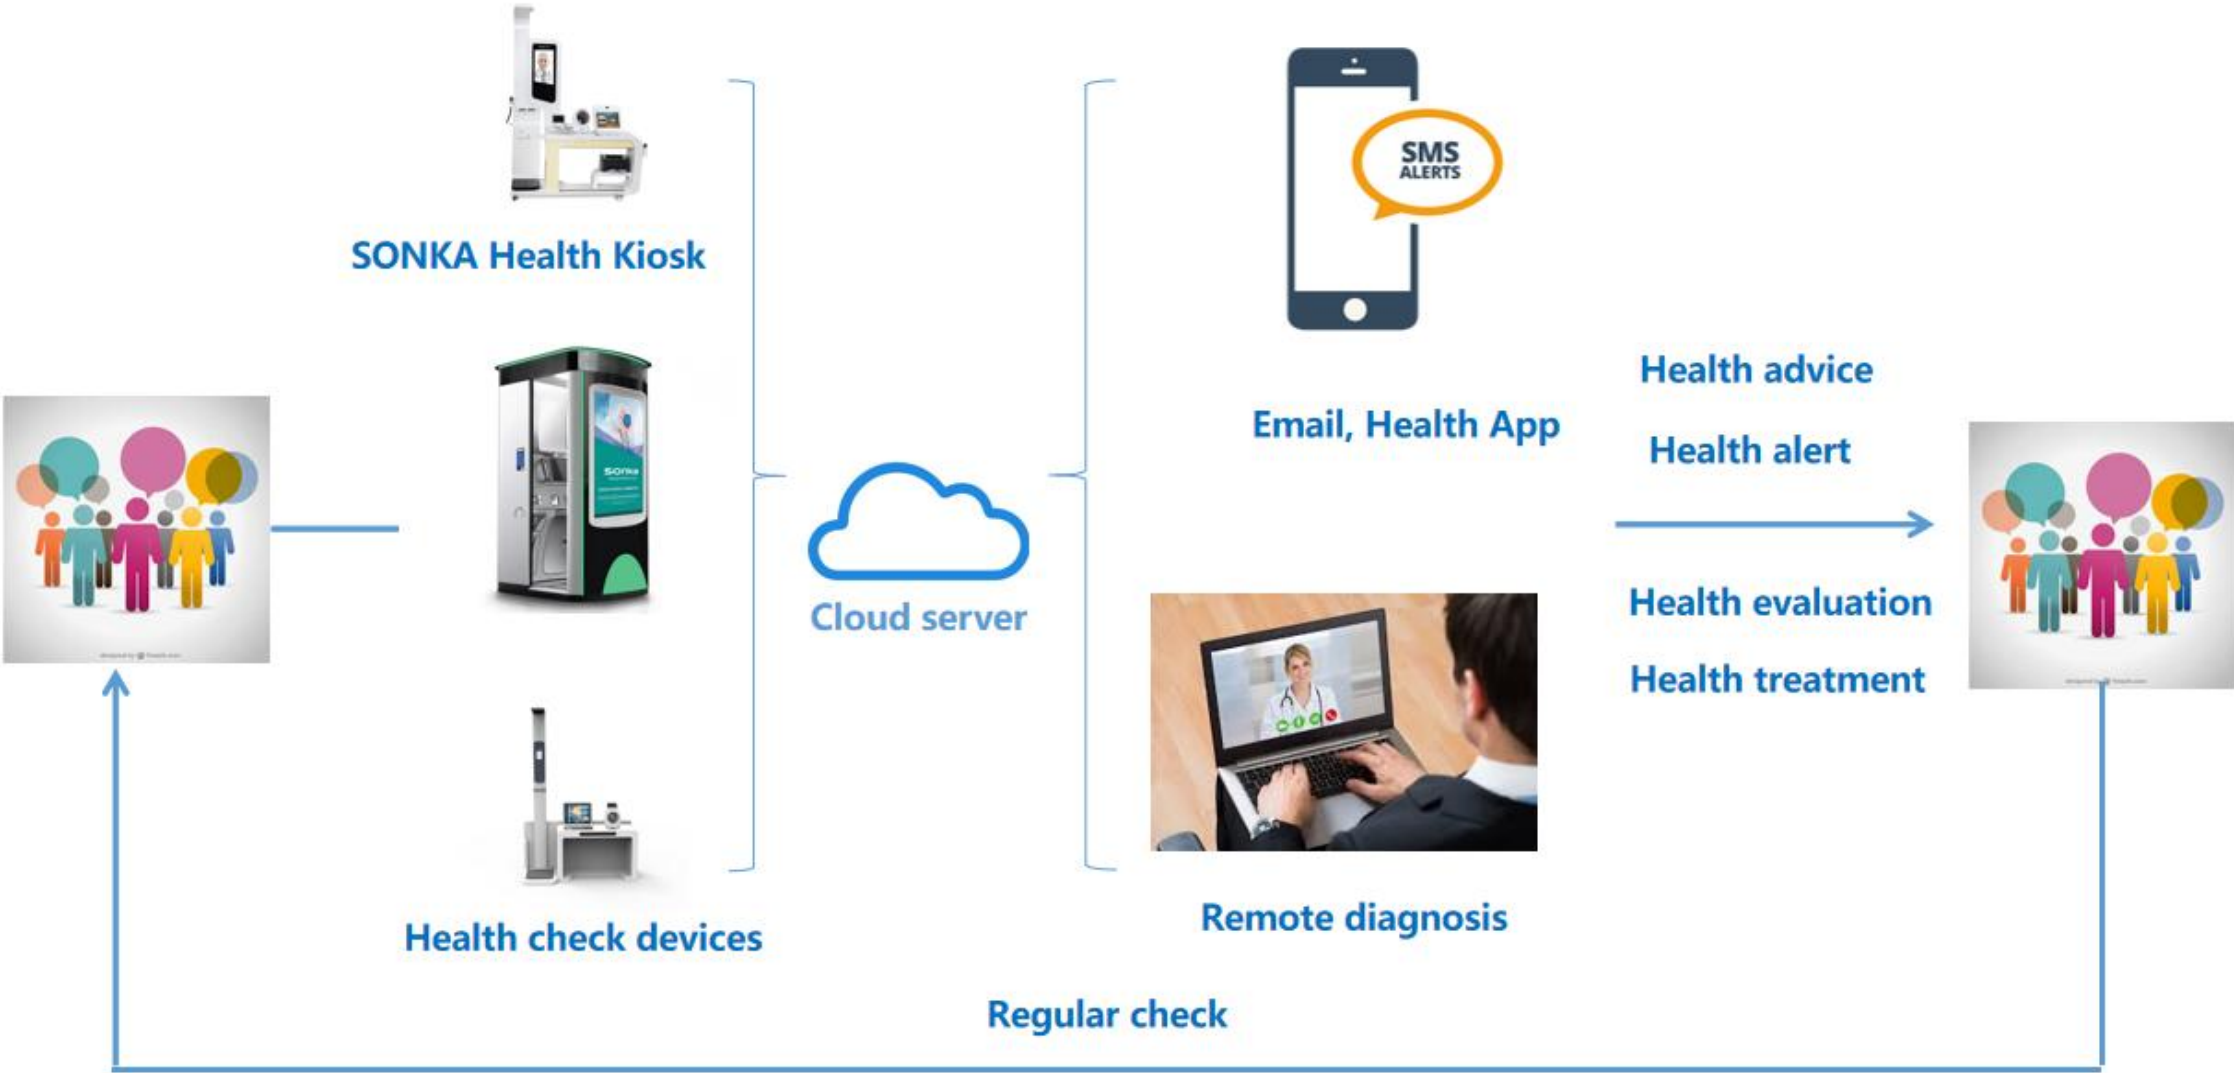

Doctor PC software real time sharing data

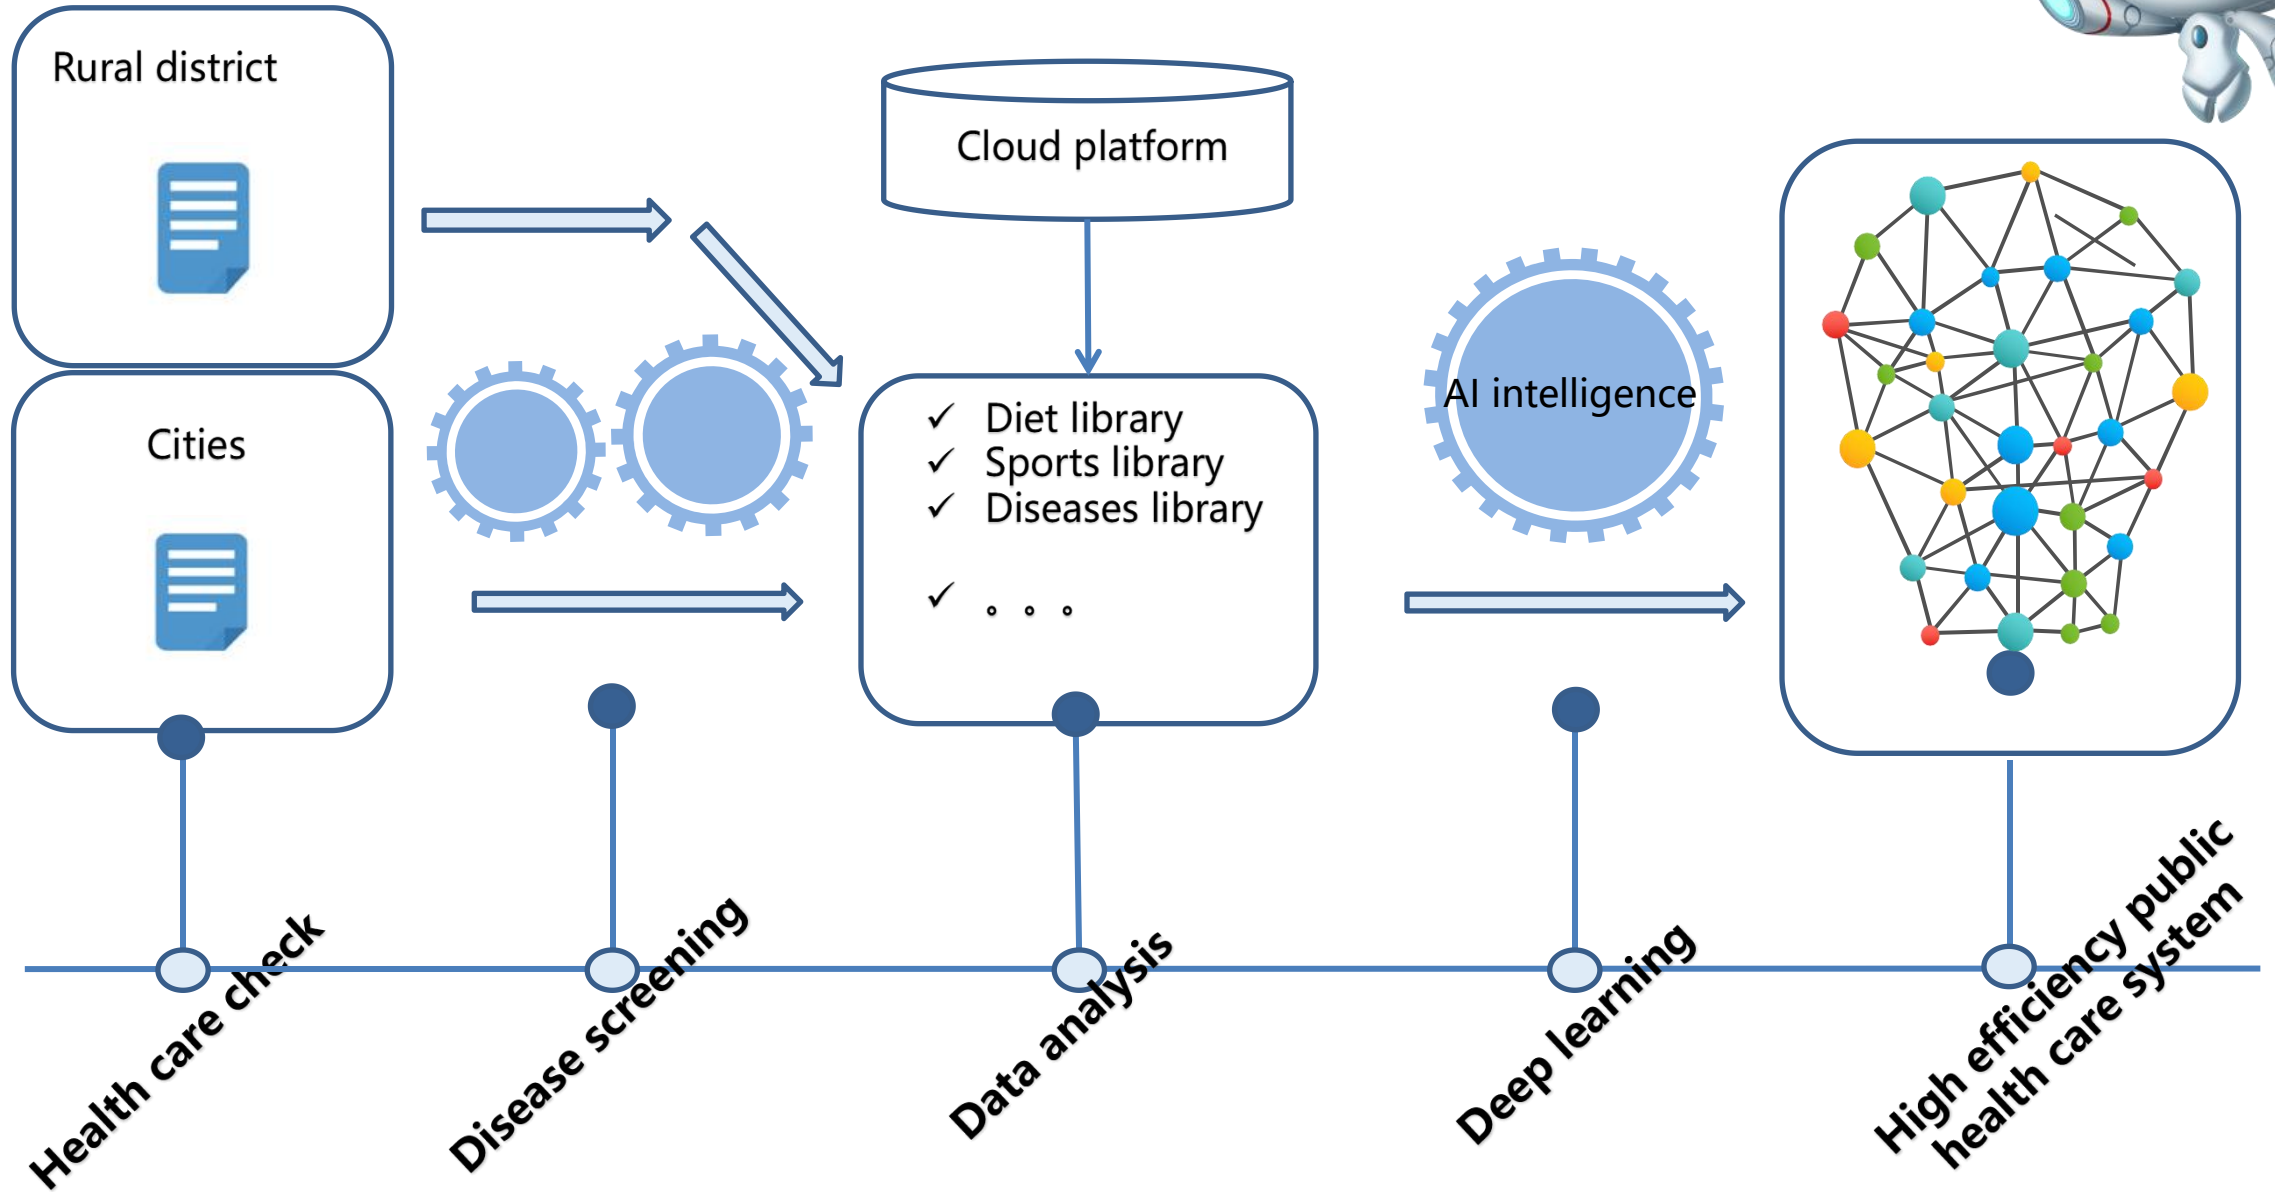

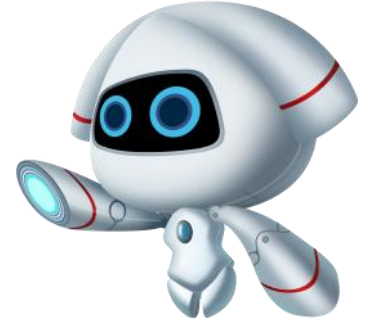

All datas will be share to the doctor computer software in real time.
