PART 01

Question: Challenges facing beauty
centers

Conventional beauty methods only go so far.

Skin problems are difficult to solve

Traditional cosmetic treatments are mostly epidermal treatments, which are ineffective for deeper skin problems such as laxity, pigmentation, and inflammation of sensitive muscles.

Post-operative repair is slow, and the redness and swelling period after laser, micro-needling and other programs is long, which affects customer experience and reputation.

Fierce competition and customer loss

Competition in the beauty market is fierce, and traditional projects are seriously homogenized, making it difficult to attract high-end customers. Lack of differentiated services and low customer loyalty, they are easily attracted by competitors.

Constrained earnings growth

The profit margin of traditional beauty programs is limited, and it is difficult to increase the customer unit price. Lack of high value-added services, it is difficult to achieve diversified earnings, limiting the overall earnings of the beauty center.

PART 02

Solution: Introduction of micro hyperbaric
oxygen chambers

Enhance beauty effect

Skin health and rejuvenation

- ◇ Hyperbaric oxygen stimulates the activity of fibroblasts, increases collagen and elastin synthesis, effectively improves fine lines, sagging, and improves skin elasticity.
Accelerates the repair of UV damage, postoperative redness and swelling, relieves inflammation of sensitive muscles, shortens the recovery period, and allows clients to see results faster.
Increase oxygen dissolution rate, enhance cell metabolism, improve skin dullness, make skin translucent and lustrous.

◇ Enhance the beauty order effect

Match with skin resurfacing and injection programs to improve cellular vitality before surgery and accelerate repair after surgery, such as hydrafacial injection and PRP for better results after surgery.

Auxiliary fat reduction and shaping, promote metabolic circulation, help decomposition of fat, can be used with cryolipolysis or radiofrequency program to enhance the effect of fat reduction.

Pore micro-opening after oxygen chamber, with essence introduction or mask, product absorption is better, to enhance the overall beauty effect.

◇ Highlights of Differentiated marketing

Highlighting the concept of “black technology anti-aging” to attract high-end customers pursuing cutting-edge beauty care and enhance the beauty center's sense of technology and high-end image.

Publicize the added value of “improving sub-health” and “relieving fatigue” to broaden customer demand and extend beauty services to the field of health management.

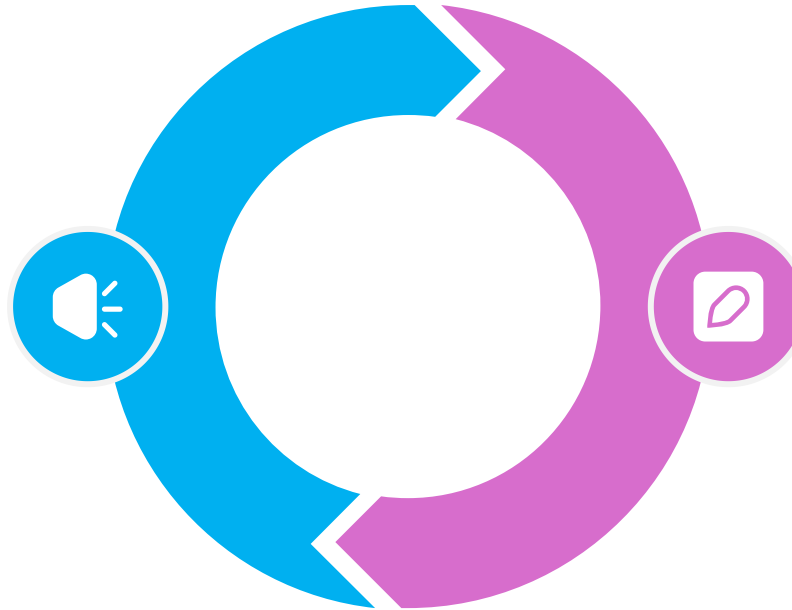

Leveraging on the celebrity effect to promote, such as Korean girl groups, European and American stars often sunshine oxygen cabin care, to enhance the attractiveness and credibility of the project.

🎬 Enhance customer experience

Comfortable and relaxing experience

The design of temperature control, movie and music in the cabin can create "Oxygen Therapy SPA" experience, so that customers can enjoy the beauty service and relax at the same time.

Through the skin tester to compare the moisture and elasticity data before and after, the visualization effect enhances the customer's trust in the beauty effect.

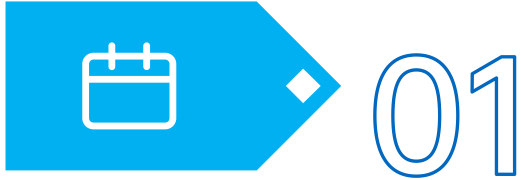

Enhance customer service

Packaged with nursing courses and annual cards to increase the unit price and increase the frequency and amount of customer consumption.

Provide a comfortable environment and quality service, so that customers can feel at home while enjoying beauty services.

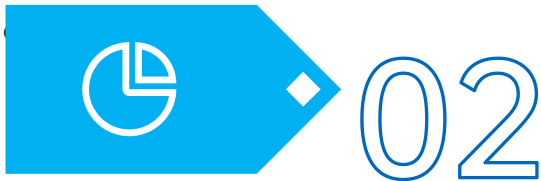

▶ MARKET OPPORTUNITY

Cost and benefit

Low cost per session, the main energy consumption is electricity, but charges can reach hundreds to thousands of dollars per session, with large profit margins.

Micro-hyperbaric oxygen chamber ($1.2\text{ATA} \leq 1.5\text{ATA}$) usually do not need medical qualification, suitable for life beauty center.

Easy operate

Simple operation of the equipment, easy to start, no need for professional medical personnel to operate, reducing labor costs.

Low maintenance cost, stable and reliable equipment, simple routine maintenance, reducing the loss caused by equipment failure.

Benefits: Increased value of the beauty
center

▶ Increase the additional service

Enhance the attractiveness of high-end customers

As a high-end beauty equipment, micro-hypebaric oxygen chamber can attract customers pursuing high-quality beauty services and enhance the customer level of beauty centers.

It provides personalized beauty solutions for high-end customers to meet their special needs and increase customer satisfaction and loyalty.

Diversified portfolio

Combine the micro-hypebaric oxygen chamber with other beauty programs to form a diversified service package to meet the needs of different customers.

Improve the added value of the project, increase customers' consumption choices, and enhance the overall competitiveness of the beauty center.

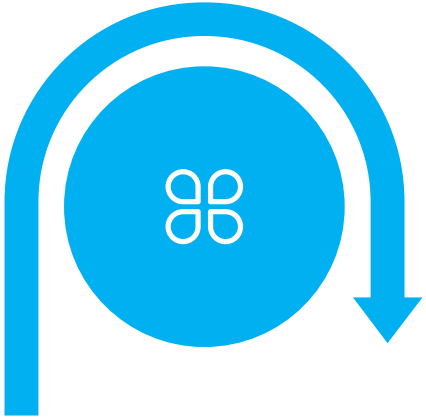

Brand image upgrading

Introducing micro-hypebaric oxygen chamber to demonstrate the beauty center's active exploration and application of new technologies and concepts and to enhance the brand image.

Through the technological sense of equipment and services, it establishes the leading position of the beauty center in the industry and attracts more customers' attention.

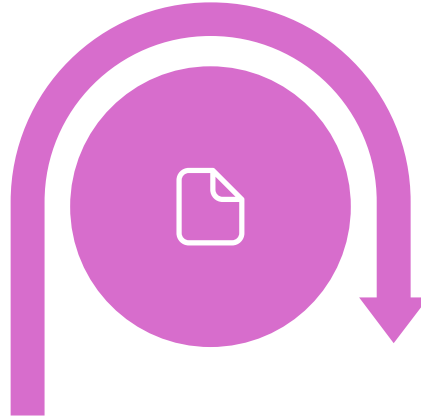

④ Increased customer experience and improved membership rates

The improvement of customer satisfaction

The comfortable experience and remarkable effect brought by the micro-hyperbaric oxygen chamber make customers more satisfied with the beauty service.

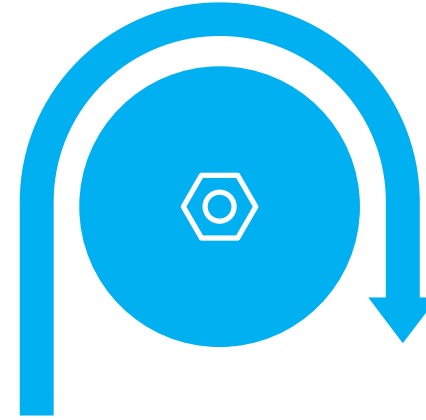

Through the visualization of data comparison, customers can intuitively see the effect of beauty treatment and enhance their trust in the beauty center

Enhanced customer loyalty

Comfortable environment and quality services make clients more willing to choose the beauty center in the long run.

Provide personalized service packages and membership system to increase customer loyalty.

Brand effect

Satisfied customers will recommend the beauty center to people around them, bringing in more potential customers.

Good feedback rate can enhance the visibility and reputation of the beauty center and attract more customers to experience.

Market cost and benefit upgrading

Cost control

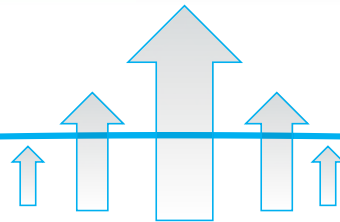

The single use cost of the micro-hypebaric oxygen chamber is low, mainly for electricity, which reduces the operating cost of the beauty center. The equipment is easy to operate, no need for professional medical personnel to operate, reducing the investment in labor costs.

Benefit increasing

Microbaric oxygen chambers charge higher fees and can generate significant revenue for beauty centers. By combining items and selling packages, it increases the customer unit price and increases the overall revenue of the beauty center.

Fast response of invest

The investment cost of micro-hypebaric oxygen chamber is relatively low, but the return is high and the return on investment cycle is short. Through reasonable operation and management, the beauty center can quickly recover the investment cost and achieve profitability.

▶ About Micro-hypebaric oxygen chamber

What is benefit of micro-hypebaric oxygen chamber in beauty center?

Micro-hyperbaric oxygen chambers (operating at 1.2–1.5 ATA) enhance post-cosmetic procedure recovery through accelerated tissue repair, reduced inflammation, and improved oxygenation.

④ Function of oxygen chamber for the patients

Faster Wound Healing & Tissue Regeneration

Stimulates collagen/elastin synthesis – Promotes fibroblast activity, improving skin texture and minimizing scarring (ideal for fillers, thread lifts, laser treatments).

Boosts cellular metabolism – Increases ATP production, speeding up recovery of damaged tissues.

Reduces Postoperative Swelling & Inflammation

Downregulates pro-inflammatory cytokines (e.g., TNF- α , IL-6), reducing redness and pain.

Improves microcirculation – Helps resolve bruising/edema (beneficial for liposuction, blepharoplasty).

Enhances Aesthetic Outcomes

Reduces hyperpigmentation – Accelerates melanin clearance after laser toning/IPL.

Anti-aging effects – Neutralizes free radicals, boosts antioxidant enzymes (e.g., SOD), improving skin firmness and glow.

④ Function of oxygen chamber for the patients

Lowers Infection Risks

Strengthens leukocyte bactericidal function, preventing anaerobic infections (critical for implant-based surgeries).

Recommended for These Procedures

Procedure	
Dermal fillers/Thread lifts	Faster healing, less bruising
Laser/IPL treatments	Reduces PIH, promotes collagen
Liposuction/Body contouring	Decreases swelling, detoxifies
Rhinoplasty/Eyelid surgery	Lowers infection risk

Clinical Protocol

Start 24–48 hrs post-op (avoid immediate use to prevent bleeding).

30–60 mins/session, 5–10 sessions recommended.

Contraindications: Severe cardiopulmonary diseases, pneumothorax, claustrophobia.

Chamber Configuration for Beauty Centres

Plan the chamber around your space.

Discuss seating, cabin size, access and available electrical supply with Bayint. Final features and accessories depend on the selected configuration.

Branding illustration. Final configuration is subject to confirmation.
